

## 48 volt system for RV solar

### Overview

With a 48V battery bank, fed by a large complement of solar (upwards of 800W) and a powerful inverter, you can be self-sufficient for power. For many RVs, this means going all-electric with no reliance on gas. BLUETTI, a global leader in clean energy solutions, just released its first RVSolar 48 volt Solar Power System, a fully integrated solution boasting 30-minute core connection for RV campers, boats, and off-grid setups. The system was recently recognized with the IFA Innovation Award “Best in Tech. We designed a 48-volt Victron system built around dual 5kVA MultiPlus II inverters, eight 48V Rich Solar batteries, and 4000 watts of rooftop solar using a Unirac rail system. The goal for this system was to enable. Check each product page for other buying options. Which do you recommend?

My other line of thought is to go with the EG4. Powered by B4810 LiFePO<sub>4</sub> batteries, it gives you over 6,000 charge cycles for years of reliable energy.
