

660 The back of the photovoltaic panel

Overview

A 660W HPBC solar panel is a high-power photovoltaic module that uses Hybrid Passivated Back Contact technology. All electrical contacts are located on the rear side of the cells, reducing shading losses and improving overall power output and efficiency. Based on 210mm silicon wafer and 132 half-cut mono-crystalline PERC cell, the Evo 6 Series photovoltaic panels comes with several innovative design features allowing higher output power up to 670W. Excellent temperature coefficient and low irradiation performance result in higher power generation. By adopting advanced HPBC back-contact cell technology, this module delivers higher power output, excellent efficiency, and stable long-term performance, making it an ideal choice for. The Canadian 660w solar panel whose dimensions are 2384 ?

1303 ?

35 mm (93. Solar Panel Series. STC: Irrdiance 1000W/m², Cell Temperature 25oC, Air Mass AM1. *Measuring tolerance: $\pm 3\%$. CAUTION: READ SAFETY AND INSTALLATION INSTRUCTIONS BEFORE USING THE PRODUCT.
