

A new track for French energy storage projects

Overview

TAGENERGY, a global leader in low-carbon energy solutions, launches construction of France's largest battery energy storage platform (France, Marne). This landmark project marks the start of an ambitious expansion plan for 2025, with accelerated solar and storage development activities. The project is expected to achieve year-end grid. PARIS (AURORA ENERGY RESEARCH)- The French energy regulator CRE has officially unveiled TURPE 7, a new grid tariff system set to take effect on 1 August 2025, designed to modernise grid pricing and accelerate the integration of battery storage and renewable energy. Building on the previous TURPE 6. Netherlands-based iron-air long-duration energy storage (LDES) startup Ore Energy has completed a grid-connected pilot of its 100-hour iron-air LDES system at EDF Lab les Renardières in France. ZE Energy, a Paris-based renewable energy leader focused on hybrid solar and Battery Energy Storage Systems (BESS), has closed a €54M. A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources. Energy storage helps to balance supply and demand.
