

Afghanistan Large Uninterruptible Power Supply Plant

Overview

That's the promise of the Kabul Large Energy Storage Station – a game-changer for a region grappling with chronic power shortages and renewable energy curtailment. As Afghanistan's first utility-scale storage facility, this project could reduce blackouts by up to 40% within two years. Afghanistan's power sector is the cornerstone of the country's economic development agenda, underpinning ambitions of industrialisation, economic growth and improved living standards. Despite the abundant resources – including hydropower, solar, wind and gas – Afghanistan continues to face energy. In the presence of the Deputy PM for Economic Affairs, Mullah Abdul Ghani Baradar Akhund, a Memorandum of Understanding was signed today, August 02, 2025, at the Government Media and Information Center between the Ministry of Water and Energy and Azizi Energy Private Company. The MoU pertains to. The Taliban has signed contracts worth 20. 75 billion Afghanis (over £230 million) with domestic and foreign companies for ten power generation projects, aimed at producing 228 megawatts of wind, thermal, and solar energy across Afghanistan. Civilian casualties remain at unprecedented levels: 10,459 killed or wounded in 2017 and 10,993 in 2018. Discover key technologies, regional impacts, and EK SOLAR's expertise in this transformative project.
