

Are there any solar power plants in Lithuania

Overview

There are 118 Solar photovoltaic power plants in Lithuania as of August, 2025. Solid biofuel or biomass represents the most common source of renewable energy in Lithuania. Most commonly used are firewood and wood as well as agricultural waste. Kruonis Pumped Storage Plant, its. Lithuania added record solar capacity in 2024, pushing cumulative installations to nearly 2 GW, driven largely by residential systems and a favorable regulatory framework. Lithuania added 870 MW of solar in 2024, setting a new calendar-year record and surpassing the 572 MW installed in 2022 and 536. In Lithuania, discussions about the expansion of solar power plants—particularly their construction on fertile agricultural land—are becoming increasingly active. The government has set more ambitious targets of 2 GW by 2030, with revised NECP drafts aiming for a 500% increase to 5. UAB „Mokita“ - Azotas Anglis Magnis.
