

Base station UPS power module

Overview

Choosing the appropriate UPS (Uninterruptible Power Supply) for base stations is crucial for maintaining continuous operation and safeguarding critical telecommunications equipment. Designed for select Smart App Online UPS systems, this EBM takes 3U of rack space and can be installed in a rack or tower configuration to match the UPS form factor. From a small UPS to save and shut down your PC, to large commercial systems that power large data centers or critical systems in hospitals, we have the solutions you and your customers. Power protection and battery backup for computer systems, office equipment, Point-of-Sale, networking, and other electronics. High performance 3-Phase power protection for. A UPS supplies power even in the event of mains failure and protects your system against supply interruptions. We offer UPS solutions for DC and AC applications where the functionality and design are optimally tailored to the requirements of various different industries. Supply your system reliably.
