

Buenos Aires Power Generation Energy Storage Frequency Regulation Project

Overview

The initiative aims to secure 264 MW of additional power for Greater Buenos Aires to improve grid reliability. The Government extended by 60 days the signing of energy storage contracts corresponding to the “AlmaGBA” program, which aims to have reserves in case of system. Summary: Discover how Buenos Aires is leveraging advanced energy storage systems to optimize power generation frequency regulation. The Buenos Aires Power Grid Energy Storage Frequency Regulation Project addresses voltage instability caused by renewable integration – a challenge familiar to cities worldwide. Imagine.
