Bulgaria underwent significant transformation after the fall of the Soviet Union over three decades ago. Since then, the country has changed from a centralized, planned economy to an open, market-based, middle-income economy anchored in the European Union and NATO. The continuing conflicts in Ukraine and in the Middle East are now accompanied als by the tension in the world trade relations. Private consumption growth is set to ease, reflecting moderating wage growth. Net exports are expected to negatively contribute to growth. Food.
