

City Solar Power Generation Policy

Overview

The City has established a goal of installing 100 Megawatts (MW) of solar photovoltaic (PV) on City-owned buildings by the end of 2030, and 150 MW by the end of 2035, as set forth by Local Law 99 of 2024. There is a patchwork of federal, state, and local policies and regulations pertaining to renewable energy systems that impact your project development. Department of Energy (DOE) under Contract No. Funding provided by Energy Office of Energy Efficiency and Renewable Energy Solar Energy. municipalities are interested in growing their local clean energy supply. Increasingly, municipalities are also able to take advantage of the. As of 2021, 38 states, four territories, and Washington, DC had adopted renewable portfolio standards or voluntary renewable energy goals, directing states to generate a percentage of their electricity from renewable energy sources by a target year. Examples include Solar PV, Wind, Biogas, Hydro Power, etc. As the electricity landscape evolves.
