

Clean solar energy for US power plants

Overview

Solar energy is the fastest growing and most affordable source of new electricity in America. A federal agency says solar, battery, and wind additions will vastly outpace new gas facilities in what's set to be a record year for power plant construction. Energy Information Administration • Note: “Other” category, which represents less than half a percent of forecast additions. Renewables now dominate new power generation capacity, while new domestic clean energy manufacturing facilities are popping up around the nation. However, headwinds are also getting stronger.
