

Container-adjusted solar panels

Overview

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no shading from a remaining container structure. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. Upgrading your shipping container home or your container. Solar panels have revolutionized the energy industry, providing sustainable and cost-effective power solutions in various applications. One of the most innovative uses of solar panels is their installation on shipping containers, offering a portable and versatile platform for generating solar. Upgrade your shipping container home or office with a solar power kit and make the transition to off the grid living effortless! This system is designed to easily connect all your essential appliances (air-conditioners, computers, lights, microwaves and more). It's equipped with a 3000 watt power. Introducing the latest option for mounting solar arrays to standard CONEX shipping containers. Modular design, can be assembled within a week. Easy to relocate, your home goes.
