

Damascus electric vehicle market

Overview

According to Engineer Thaer Ringous, the Director of Damascus Transport, a total of 57 electric cars have been officially registered, along with 54 hybrid vehicles that run on a combination of gasoline and electricity. The Syrian car market in 2025 continues to experience sharp price fluctuations due to high demand and limited supply. New cars are available but at very high prices compared to regional markets. This has sparked numerous inquiries about these eco-friendly cars, including their functioning. How does 6W market outlook report help businesses in making decisions?

6W monitors the market across 60+ countries Globally, publishing an annual market outlook report that analyses trends, key drivers, Size, Volume, Revenue, opportunities, and market segments. This report offers comprehensive. A vehicle that uses one or more electric motors for propulsion is referred to as an electric vehicle (EV). It can be driven independently by a battery, a collector system, or electricity from extravehicular sources (sometimes charged by solar panels, or by converting fuel to electricity using fuel. Electric vehicles have made their presence felt on the streets of Damascus, albeit in limited numbers. This attention did not come out of nowhere.
