

EU export tariffs on solar modules

Overview

Combined with the latest international trade information in 2025 (such as HS code confirmation, Tax Rebates Adjustments, tariff developments, and quality-standard requirements), we have compiled a practical guide. Here, we outline the mechanics of this dual-access model and what it means. TARIC, the integrated Tariff of the European Union, is a multilingual database integrating all measures relating to EU customs tariff, commercial and agricultural legislation. With 85% of PV manufacturing currently concentrated in Asia and China supplying over 80% of global polysilicon, these tariffs are poised. China's PV manufacturing sector is operating at full capacity ahead of an April 1 export tax change, contributing to module price increases of 20% to 30% in parts of the supply chain and raising risks for price-sensitive European commercial and utility-scale projects in early 2026. If nothing changes, this.
