

Electric RV with solar charging

Overview

It's a Vee Dub Camper. But electric. That's the start, but the Type 20 is more than just a sparked-up, retro plug-in. Commissioned to celebrate the evolution of the company's Electronics Research Laboratory into the Innovation and Engineering California (IECC), it's based on the shape and style of a 1962 Microbus. Based on the Nissan e-NV200, Sussex Campervans have created their all-electric campervan and we are seriously impressed. The e-NV200 was a long-term project for the Horsham-based firm and they have. The biggest of the bunch, the E-Mobile from a consortium of German companies under the brand Iridium, is in its second generation and uses a 140kW powertrain from Stuttgart based electric vehicle company EFA-S, to. This e-camper by Hillside Leisure is also based on the Nissan e-NV200 and features the outstanding quality that we have come to expect from. And we're back again to finish where we started, with a concept from Volkswagen, although you'll have to wait until 2023 to drive their new electric Microbus. VW is no stranger to reimagining.
