

Energy storage new energy fire incident

Overview

On the afternoon of 16 January 2025, a fire broke out at Moss Landing Energy Storage Facility in Monterey County, California, US, prompting the evacuation of 1,200 to 1,500 local residents. According to a press conference the following day by Monterey County authorities, a Level 2 activation of the. The Escondido BESS fire highlights the urgent need for improved safety in battery energy storage. As lithium-ion fires become more frequent, solutions like immersion cooling and smarter fire suppression are essential. Environmental Protection Agency (EPA) has entered into a settlement agreement with Gateway Energy Storage, LLC to direct cleanup in the wake of a lithium-ion battery fire that occurred at the company's energy storage facility in San Diego. Here is what happened recently and how the incident was dealt with.
