

Equipment for energy storage

Overview

Utility-scale systems combine energy arbitrage, frequency regulation, capacity payments, and transmission deferral benefits. To cope with the problem of no or difficult grid access for base stations, and in line with the policy trend of energy saving and emission reduction, Huijue Group has launched an. The Sunplus Hybrid Storage Inverters are designed to increase energy independence for homeowners and commercial users. The Hybrid Inverter power range is from 3kW to 60kW, compatible with low voltage (40-60V) batteries and high voltage (150-800V) batteries. It has multiple advantages such as safety, reliability, ease of use, and flexible adaptability. It can be widely used in application scenarios such as industrial parks. Eaton energy storage systems enable communities and businesses to access a safe, reliable and efficient solution to support the electrification of transportation. Together, we will accelerate and simplify the deployment of EV charging infrastructure.
