

Foreign solar power balls

Overview

A team of researchers at KU-KIST Graduate School of Converging Science and Technology, Seoul, has now reported a way of absorbing nearly the full usable solar spectrum in thermal-based devices, using self-assembling gold nanospheres called plasmonic colloidal supraballs. A German architect with a clear artistic flair has applied his incredible talent to the creation of a crystal ball that generates power. It sounds like something out of a traveling carnival, but the beta. ey, as it's been named by its creator, is functional as well as eye-catching. Fast & Free shipping on many items!
