

GCL s photovoltaic panel ranking

Overview

Solar panels earning the Very Good rating perform above average across a range of criteria, and may only miss out on the highest ranking due to a shorter warranty, lower efficiency, or decreased performance under sub-standard conditions. Among the most significant developments last month was LONGi's leap in efficiency, with its latest Hi-MO 9 module reaching 24.1%, matching Maxison's top-performing product. This marked a major milestone for LONGi, which improved its commercial module efficiency by 0.9% absolute – its first such gain. It and GCL-Si with A-rated grades. Whereas, the other solar manufacturer candidates, namely Astronergy, Seraphim, Talesun and DMEGC fell under the tier 2 Solar, Yingli, Trina, and Canadian. 3% market share of solar modules, according to PV Insights' market. Note: This Tier 1 ranking is based solely on the financial stability of the manufacturers and should not be interpreted as a measure of solar panel performance or quality. Although Chinese companies continue to dominate, changes in rankings and technological strategies reveal a deep transformation within the solar sector.
