

Grid modernization norway

Overview

The Nordic TSOs publish the report Nordic Grid Development Perspective 2025. In the report we present our perspective on the overall trajectory of the Nordic power system, which is undergoing significant changes with the expansion of renewables, electrification and new industrial demand. This. The electricity grid enables electricity transport from producers to consumers, and connects Norway's power system to other countries' systems. In business and industry. Hammerfest, Norway (May 21, 2025) - GE Vernova Inc. (NYSE: GEV) today announced the forthcoming deployment of two high-voltage 420 kV sulfur hexafluoride - free (SF 6 -free) gas-insulated substations (GIS) for Statnett SF, Norway's Transmission System Operator (TSO), and Equinor ASA. The NGDP is intended to complement the national planning processes and network development plans, and the regional and European. The MaksGrid project, a new initiative under the Pilot-E scheme, in which DNV is the project manager set to test innovative solutions that could potentially increase the utilization of the power grid by 25%.
