

Has the solar power station started construction

Overview

Oslo/Bogotá, 24 February 2026: Scatec ASA, a leading renewable energy solutions provider, has reached financial close for the 130 MW “Barzalosa” solar plant in Colombia, and is starting construction. Roughly 12 gigawatts of new solar capacity joined the grid in the first half of the year, and 21 gigawatts more are slated for completion by the end of the year, according to a recent survey by the federal Energy Information Administration. In recent years, solar has dominated new power plant. Enbridge is building the Sequoia Solar project to provide clean electricity via long term power purchase agreements to AT&T and Toyota North America. As electricity demand continues to grow across the U. At the same time, the company unveiled that construction has also started for the Barzalosa project.
