

Huawei Bissau s new solar panels

Overview

Featuring a 400MW solar PV system coupled with a 1.3GWh energy storage system, this ambitious project is set to revolutionize sustainable energy solutions in hospitality. Global technology giant Huawei is at the helm of this groundbreaking venture. HUAWEI FusionSolar advocates green power generation and reduces carbon emissions. It provides smart PV solutions for residential, commercial, industrial, utility scale, energy storage systems, and microgrids. With 65% of Guinea-Bissau's population lacking reliable electricity-starved Guinea Bissau will get \$48m from the International Development Association, Green Climate Fund and Esmap to catalyse solar energy generation and improve on low levels of electricity. These mini-grids will use renewable energy sources, combining around 500 kW of solar photovoltaic. Huawei Digital Power integrates digital and power electronics technologies, developing clean power, and enabling energy digitalization to drive energy revolution for a better, greener future.
