

Hungarian zero-decay energy storage system

Overview

The Hungarian scheme supports the installation of at least 800 MW/1600 MWh of new electricity storage facilities and aims at supporting storage investments to facilitate smooth integration of renewable energy sources in the Hungarian electricity system. The European Commission has approved a €1. It also targets reducing Hungary's dependency on fossil fuel imports, notably natural gas from Russia, while accelerating the energy transition in line with the REPowerEU Plan and the Green Deal. The government is announcing a residential energy storage program with a budget of HUF 100 billion (EUR 261 million), the Minister heading the Prime Minister's Office said on Wednesday in Budapest. 2 billion) scheme from the government of Hungary to support large-scale energy storage projects. Hungary seeks to increase storage capacity in order to offer greater grid flexibility. Credit: Dorothy Chiron via Shutterstock.
