

# Kosovo solar energy market

## Overview

Kosovo's solar energy sector is poised for substantial growth, with the country's energy minister, Artane Rizvanolli, announcing plans to add 100 MW of new solar capacity by the end of 2025. This expansion will be driven by the introduction of larger-scale ground-mounted solar parks, contributing to the country's goal of achieving 400 MW of solar capacity. Kosovo has prioritized the modernization and improvement of the country's energy sector generation capacity through investment in and development of its significant renewable energy sources. new wind and PV capacities to be developed until 2031 of electricity consumption by RES by 2031 small-scale. On behalf of the German Federal Government, KfW is supporting the construction of a large photovoltaic system with an installed capacity of up to 100 MW to promote decarbonisation. It will contribute to significantly reducing greenhouse gas emissions and pave the way for further investment. The. As a potential European Union (EU) candidate and an Energy Community (EnCT) Contracting Party, Kosovo is embracing the climate and energy priorities of the union, aligning itself with the ultimate climate-neutral ambition by 2050.
