

Map of solar energy potential

Overview

The GSA provides an interactive map of solar resource and photovoltaic power potential and a variety of other environmental data relevant for understanding the practical and technical potential of solar power systems at any given geographic location. Start exploring solar potential by clicking on the map. Calculate energy production for selected sites. We use cookies to give you the best experience while visiting our website. By clicking 'Accept' or by continuing. Explore solar resource data via our online geospatial tools and downloadable maps and data sets. Professional solar potential map, PV yield estimator, and renewable energy site analysis tools. Access high-resolution static maps to visualize global solar potential. For site-specific prospecting and bankable project analysis, use our professional solutions.
