

New Energy Storage Power Statistics

Overview

Energy Storage Market Outlook Q1 2026 (ESMO) released today by the Solar Energy Industries Association (SEIA) and Benchmark Mineral Intelligence, as of 2025, 137 GWh of utility scale storage has been installed in the United States. 19 GWh of commercial and. According to the U. The International Renewable Energy Agency (IRENA) produces comprehensive, reliable datasets on renewable energy capacity and use worldwide. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory report. This amount represents an almost 30% increase from 2024 when 48. 19 GWh of commercial and industrial (C&I). Solar and battery storage are set to account for 79% of 86 GW of new utility-scale capacity planned in the United States in 2026, marking the largest annual increase in more than two decades, according to US federal data. With renewable sources expected to account for the largest share of electricity generation worldwide in the coming decades, energy storage will play a significant role in maintaining the balance between. Houston/WASHINGTON, D. energy storage market set a record for quarterly growth in Q2 2025, with 5.

Article Content

Battery Energy Storage Systems Statistics And Facts ...

In this article, I'll walk you through all the important battery energy storage system statistics, where it started, how much it has grown, which ...

U.S. energy storage sets new record with 5.6 GW ...

The U.S. energy storage market set a record for quarterly growth in Q2 2025, with 5.6 GW of installations, according to the latest U.S. Energy ...

US Energy Storage Installations Reach New Quarterly Record in Q2 with 5 ...

While early adopters continue leading in deployment, activity across the country shows clear demand for utility-scale ...

Solar, battery storage to lead new U.S. generating capacity additions ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...

Global Trends in Energy Storage: Power Industry Statistics and Future ...

How is the electric power industry adapting to renewable energy storage demands? Discover key statistics, emerging technologies, and market insights reshaping global energy systems.

Renewable energy statistics 2025

Newsletter The International Renewable Energy Agency (IRENA) produces comprehensive, reliable datasets on renewable energy capacity and use worldwide. Renewable energy statistics 2025 ...

Solar, storage to lead record 86 GW of US capacity in 2026

Solar and battery storage are set to account for 79% of 86 GW of new utility-scale capacity planned in the United States in 2026, marking the largest annual increase in more than two decades ...

Energy Storage Reports and Data

The following resources provide information on a broad range of storage technologies.

U.S. Adds 58 GWh of New Energy Storage Capacity in 2025

Two-thirds of all utility scale energy storage capacity installed in 2025 was built in states won by President Donald Trump, including 9 of the top 15 states for new installations.
