

Off-grid solar-powered container for ships in Sierra Leone

Overview

As Sierra Leone accelerates its renewable energy adoption, battery energy storage containers have emerged as game-changers for power stability. The Mobil-Grid ® is an ISO-standard, CSC-approved maritime container that integrates a photovoltaic power plant, ready to be deployed and connected, with integrated control cell and batteries. This article explores how modular energy storage systems address the nation's unique energy challenges while supporting solar/wind integration, industrial. The Off Grid Container also transports the solar PV panels and mountings, the only part of the product which has to be assembled at the customer's site. The on-site installation is undertaken by the Off-Grid Installer team and after all clients are included in the online remote monitoring service. Who is supplying containerized solar power in Sierra Leone?

Photo: Michael Duff – InfraCo PowerGen, through their Sierra Leone project company Off-Grid Power (SL) Ltd*, has tendered 20 containerized solar systems for implementation in Work Package 2 of the RREP. The German system integrator and EPC.
