

Outdoor solar power hub has the highest sales volume

Overview

By mounting, ground mounted led the market and held the largest revenue share of 62. The US solar industry installed 11.7 gigawatts direct current (GWdc) of capacity in Q3 2025, a 20% increase from Q3 2024, a 49% increase from Q2 2025, and the third largest quarter for deployment in the industry's history. solar market in 2025 is characterized by record installation growth coupled with significant market headwinds and shifts. As of September 2025, deployment numbers are soaring to new highs, yet industry players also face challenges like policy uncertainty, financing hurdles, and supply. In Wood Mackenzie's quarterly US PV Leaderboard, available via the US Distributed Solar Service, we rank the top solar installers and equipment suppliers. You can also fill in the form for a. Solar photovoltaics is one of the most cost-effective technologies for electricity generation and therefore its use is growing rapidly across the globe. Global solar photovoltaic capacity has grown from around 40 gigawatts in 2010 to approximately 2. Only in that last year. IEA PVPS has released its latest Trends in Photovoltaic Applications 2025 report, revealing that the world's cumulative installed PV capacity surpassed 2 260 GW by the end of 2024, marking a 29% year-on-year increase. According to the report, 2024 was another record year for solar PV, with between.
