

Photovoltaic panels connected to a single pole

Overview

Pole-mounted solar systems support multiple solar panels on a single pole and elevate panels higher off the ground than a standard ground mount. These versatile mounting solutions offer unparalleled flexibility for off-grid applications, agricultural settings, and. Get a personalized Design & Offer within 24 hours! Our Single Post ground steel solar mounting system is a durable solution designed for large, medium, and small-sized solar parks. Systems from 10 Watts to 480 Watts using pole-mount solar panels can easily be mounted on vertical poles ranging from 2" to telephone poles. They're usually more expensive than roof-mounted systems, but can maximize your renewable energy production depending on your roof's orientation and shading. Always refer to the NEC code in effect or consult a licensed electrician for safety and accuracy.
