

Plug and play energy storage device

Overview

A plug-n-play battery is a portable energy storage unit that requires no technical expertise to set up or use. Just like the name suggests, you simply “plug” it into your device or system and it's ready to “play.” With a modern plug-and-play system, everything is combined into a single, small, easy-to-use package, as opposed to traditional configurations that call for separate components, meters, and circuit changes. At HYXiPOWER, our goal is to provide our customers with a flawless experience by making. Pila's first-of-a-kind Battery Mesh Network coordinates all Pila batteries across your home to store solar or utility power, and optimizes energy for outage protection, bill savings and more.
