

Solar panel payback price

Overview

Before looking at solar payback time, we need to know how much is being invested. For the average UK home, solar panels will cost £6,000 – £7,000, about 60% cheaper than in 2010. So, despite the Feed-in Tariff (FiT) coming to an end, solar payback time could still be shorter than if you installed solar panels a few years ago. To help give you an idea of how long solar panel payback time could be, we've used our solar payback calculator, a tool that works out your specific solar payback time using certain criteria. As we've seen, it's possible to see a return on your investment in solar thanks, in whole, to the savings being made on your electricity bills. To reduce. To help get your solar panel installation off to the best possible start, complete our simple online form and you'll get free solar panel installation quotes from up to 4 solar installers in your local. By adding a solar battery to your solar panel system, you will be able to store up excess solar energy generated during the day (there's likely to be.
