

Swedish foldable solar panel manufacturer

Overview

Midsummer is a Swedish solar energy company that installs discrete solar roofs that we manufacture in Järfälla with 90% lower carbon footprint than traditional solar panels. We have a high-tech, Swedish product and own the entire value chain from development and production to. Fasadsystem is now launching mobile and foldable solar modules for the construction industry and the modular real estate industry. The solar panel module is suitable for construction sheds and other movable premises such as temporary school premises, office premises and apartment buildings. Our business concept is to sell renewable energy systems where sun energy is captured and stored. The system can then deliver electricity 24/7 at any place and no need for infrastructure like transmission and distribution lines. The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems.
