

Tax on sales of solar power generation equipment

Overview

Many states have either a solar or wind exemption, which provides that equipment used for electricity generation by either solar or wind be exempt from sales tax. Florida, for example, provides an exemption for solar energy systems, and New York provides a specific sales and use tax exemption for. Solar tax exemptions include both property and sales tax exemptions provided by state and local governments to individuals and companies that install solar energy property. Property tax exemptions allow businesses and homeowners to exclude the added value of a solar system from the valuation of. The owner of a qualified solar facility may claim the investment tax credit ("ITC"). With a host of tax and incentive programs, there are many reasons for taxpayers to install solar power generation systems. The tax. A solar energy system is defined as any solar collector or other solar energy device that provides for the collection and distribution of solar energy and, where applicable, the storage of solar energy.
