

The price of installing various solar panels

Overview

solar cost per square foot in 2025: \$6 – \$12 after the 30% federal tax credit. The most accurate pricing metric is still cost per watt, but per-sq-ft estimates are helpful for. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. The cost of installing solar is far less intimidating when you understand the various components, how savings are generated, and different ways to lower your cash outlay through financing. In this article, we'll explore: Do solar panels really save you money?

As always, our goal is to empower you. A single solar panel costs between \$120-\$315 for the equipment only, or \$1,000-\$1,200 when professionally installed. The final price depends on panel type, wattage, brand quality, and whether you're buying individually or as part of a larger system. Understanding individual solar panel costs. Solar panels cost about \$21,816 on average when purchased with cash or \$26,004 when purchased with a loan for a 7. While that price tag seems steep, the electricity bill savings you get from solar panels make them a worthwhile investment for most Americans.
