In 2006, the United Kingdom had installed about 12 MW of photovoltaic capacity, which represented only 0.3% of total European solar PV of 3,400 MW. In August 2006, there was widespread news coverage in the United Kingdom of the major high street electrical retailers Currys' decision to stock PV modules, manufactured by Sharp, at a cost of £1,000 per module. The retailer also provided an installation service.
