

Waterproof grade standard for outdoor base stations

Overview

Telecom base stations on rooftops require IP66-67 die-cast enclosures for long-term rain and EMI protection. The IP code or Ingress Protection code indicates how well a device is protected against water and dust. It is defined by the International Electrotechnical Commission (IEC) under the international standard IEC 60529 which classifies and provides a guideline to the degree of protection provided. The Ingress Protection (IP) rating, defined by IEC 60529, is the global standard that classifies the degree of protection offered by electrical enclosures. 11ac Wi-Fi standard, combined 1200Mbps Wi-Fi speed over 2.4GHz (300Mbps) and 5GHz (900Mbps), equipped Gigabit WAN port, fast Ethernet data rate make more than 100 end users can access into it to. A compact outdoor Wi-Fi 6 CPE with a powerful 16 dBi antenna, AP mode, and multiple mounting options – perfect for masts, poles, or rooftop deployments.
