

Wind power generation project

Overview

Cleanview tracks 10,000+ power projects, 1,000+ data centers, and 700+ developers in the U. Each month we spend hundreds of hours researching and updating our database. Start a free trial to access: [Here is a map of all utility-scale wind farms in the US. since 2019, with more than 153 GW installed.](#) Although the country's capacity more than doubled from 2014 to 2023, most of the wind energy produced is onshore, with the offshore wind farms slowly rising. These projects are being scaled up to unprecedented sizes, pushing the boundaries of renewable energy technologies. Modern wind turbines are. The United States Wind Turbine Database (USWTDB) provides the locations of land-based and offshore wind turbines in the United States, corresponding wind project information, and turbine technical specifications. Or, if you're working on your own wind turbine project, continue reading to learn more. This output consists of three subcomponents: (i).

Article Content

U.S. Wind Turbine Database

The United States Wind Turbine Database (USWTDB) provides the locations of land-based and offshore wind turbines in the United States, corresponding wind project information, and turbine technical ...

Top 10: Wind Energy Projects | Energy Magazine

Wind farm projects are taking shape both onshore and offshore all over the world. These projects are being scaled up to unprecedented sizes, ...

Offshore Wind Energy & Our Wind Projects in the U.S.

As a global leader in offshore wind, we have over 30 years of experience in building and operating offshore wind power. We're investing \$20 billion to expand U.S. ...

US Wind Farm Map

Interactive map of wind farms in the US. View the largest projects, track new developments, and explore capacity data across all states.

Wind Energy | Department of Energy

Land-based, utility-scale wind energy projects use highly efficient, state-of-the-art wind turbines that generate cost-competitive electricity at power-plant scales.

49345-002: Wind Power Generation Project | Asian Development Bank

Diversification to renewable energy sources, such as wind and solar energy, will improve the country's energy security and the environment.

South Dakota just approved its largest wind farm ever

South Dakota regulators approved a 333 MW wind farm across 68,300 acres that will become the state's largest when built.

Wind Turbine Projects | Windpower Engineering

Windpower Engineering is dedicated to bringing you constant updates on wind turbine projects and wind turbine companies from across the ...

SunZia Wind and Transmission

The wind project is paired with SunZia Transmission, a 550-mile (890 km), 3-gigawatt HVDC transmission line to carry the power to Arizona and California. SunZia Wind and Transmission are ...
