

Yerevan first solar

Overview

The official opening of SolarOn, the first solar panels producing factory in Armenia, will take place on June 29 in Yerevan. Solaron was founded in 2016. We believe that renewable energy sources can improve the quality of our lives and promote sustainable development in our country because. US solar giant First Solar signed a patent licensing agreement with the UK's Oxford PV, a University of Oxford spin-off, giving it access to issued and pending patents covering perovskite materials, one of the most important next-gen solar technologies. The non-exclusive deal allows First Solar to. We provide after-warranty service of our systems as well as the systems installed by others Its recommended to clean the solar panels once a year or more often if the place is dusty Create a low-risk source of guaranteed stable income which will do for more than 20 years! Not sure which product. Armenia and the UAE have agreed to begin the construction of the industrial-scale photovoltaic solar power plant "Ayg-1" in Armenia in early 2026. The company has been operating in test mode since spring and has already implemented a number of projects. Solaron started its solar panel production activities on June 29, 2016, becoming the first Armenian manufacturer of solar panels. Our annual production capacity of solar panels is 60 MW.
